Forecast for Friday 10 Feb 2023

Weather: Mainly high level cloud beginning to thicken and lower towards dawn with some mist, drizzle and patchy light rain through the morning. This tending to clear in the afternoon but remaining quite cloudy with some mist. The best chance of any brightness will be over in the east in the afternoon. Mist becoming more widespread again in the evening period.

Chance of cloud-free hill tops above 600m: 50% falling to 20% in the morning, improving to 50% in the afternoon

Low Cloud and visibility: Patchy low cloud above 500m around dawn, cloud will thicken and lower as rain and drizzle spreads in, cloud becoming broken or extensive above 400m during the morning with poor visibility beneath in rain, mist and drizzle. There will be an improvement in the afternoon with cloud becoming more scattered above 500m and visibility becoming moderate or good, possibly becoming poor again in the evening as widespread mist and possibly fog reforms.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Remaining quite breezy at height with strong gusts. A significant wind chill in rain and drizzle and strong winds during the morning, this will ease in the afternoon as freezing levels lift and rain eases.

Recent rainfall: measured at Malham: altitude 375m

Forecast for Saturday 11 Feb 2023

Weather: A cloudy start to the day with some mist and fog patches but cloud tending to lift and clear in the afternoon with a few bright or sunny spells later. Mainly dry throughout.

Maximum wind: Westerly 20mph gusts 30mph decreasing during the day to 10-15mph by mid afternoon

Chance of cloud-free hill tops above 600m: 50% in the morning with scattered low cloud, improving to 80% in the afternoon.

Low Cloud and visibility: Scattered low cloud above 500m around the hills in the morning with mainly good visibility below, except where mist or fog has formed where visibility will fall poor or very poor for a time. Cloud will become patchy in the afternoon, mainly restricted to the southern hills above 500m with good visibility below the cloud.

Temperature: **Valleys:** Plus 8 Celsius.
At 600m: Plus 5 Celsius.
Freezing level: Above all summits.
